

One system for every message, every lead and every follow-up.

WhatsApp, team inbox, CRM, AI agents and automation — working as one system instead of a pile of apps that don't talk to each other. Built for Indian businesses.

Everything a growing business needs to **answer, sell, book and follow up** — working as one.

Wakflow connects your WhatsApp number, your team's shared inbox, your CRM, your AI assistant and the automation that ties them together — so a new enquiry is answered in seconds, saved with its source, and followed up without anyone copying it between apps by hand.

// THE PROBLEM

● Your tools don't talk to each other.

A WhatsApp lead is typed into a sheet by hand, and the follow-up depends on someone remembering.

● Every extra app is another login and another bill.

Small teams end up managing software instead of running their business.

● Enquiries get answered late, or not at all.

Nobody can watch WhatsApp, Instagram, a website form and a phone line at the same time.

● When something breaks, nobody notices.

A disconnected number or a stuck automation stays hidden until a customer complains.

// HOW IT WORKS

1 A customer gets in touch WhatsApp, Instagram DM or comment, website form, chat or email.	2 An AI answers first 24x7, from your own prices and policies, in the customer's language. Hot leads get a call back within a minute.	3 The lead is saved In your CRM with its source and interest, plus a follow-up task for your team.
4 A human takes over The full conversation sits in the shared inbox; the right person picks it up and the AI steps aside.	5 Follow-ups run by themselves Confirmations, payment reminders, offers and feedback requests — no one pressing send.	6 You stay in control One short morning report from your AI assistant, and nightly backups of everything.

// PROOF

We run our own businesses on Wakflow.

Ghoomo Saste Me and Tripwaley — our own travel brands — run on the same products we sell. As of 27 Sep 2026.

91,907

// BUILT FOR INDIAN BUSINESSES

Travel and tours

AI agent quoting live packages, AI call-backs, seat-hold bookings with payment reminders.

Real estate

Instant welcome with brochure and location, site-visit booking agent, property pipeline.

Clinics and hospitals

AI receptionist for bookings and timings, reminders, reports sent on WhatsApp.

Coaching and education

Admissions CRM, AI counsellor on WhatsApp, fee reminders and class alerts.

E-commerce and D2C

Order-status agent, one inbox for Instagram and WhatsApp, cart-recovery broadcasts.

Restaurants and cloud kitchens

Menu and location auto-replies, booking agent, daily offers and review requests.

Furniture and home décor

AI agent matching products from your live catalogue sheet, then a salesperson.

Gyms and salons

Membership renewal and appointment reminders, an Instagram DM inbox.

B2B distributors

Dealer CRM, WhatsApp order capture, payment reminders, outbound prospecting.

Service businesses

Client CRM, automatic document collection and a personal AI assistant for the owner.

17 products. One system.

Start with one product and add the rest later — everything connects without starting over. Most businesses begin with WhatsApp Connect plus the AI WhatsApp Agent, or the Inbox.

FLAGSHIP The assistant that ties the whole platform together for a business owner.

01

Wakflow Personal AI Assistant

★ FLAGSHIP

Personal AI Assistant

84

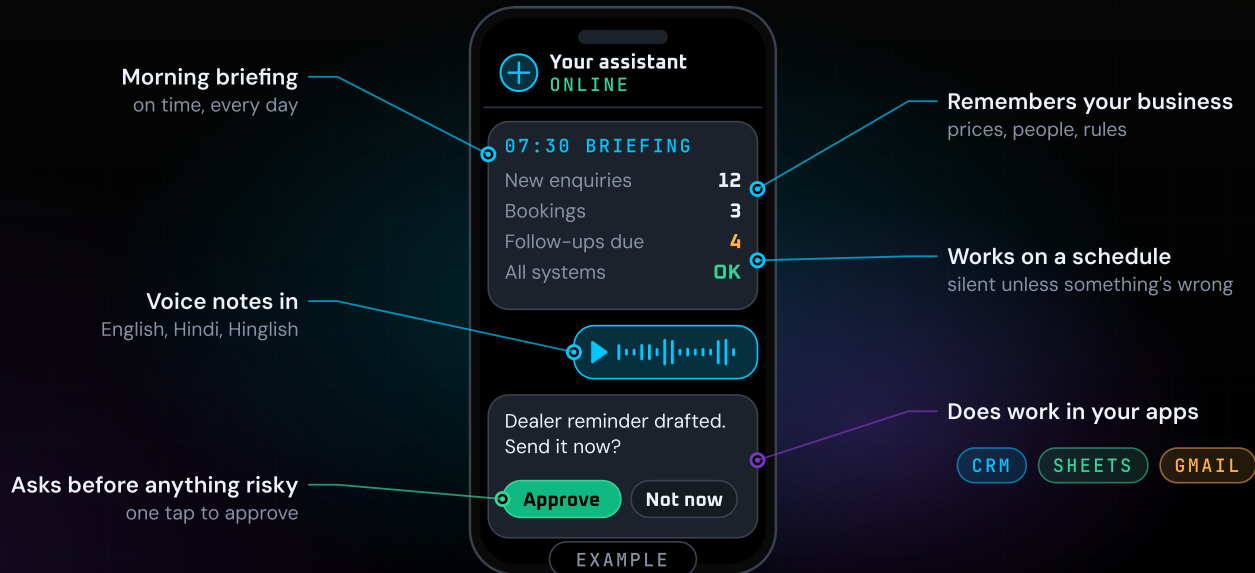

FEATURES

Your own AI employee. Works 24/7 from your phone.

A private AI assistant in the chat app you already use. It knows your business, sends your daily reports on time, researches, drafts and follows up — and asks you before anything risky.

REPLACES

The AI chat app that forgets you, the assistant you brief every morning, and opening five apps to check the business is fine.

// THE PROBLEM

- Everything waits for me.
- ChatGPT is clever, but it forgets me and it can't actually do anything.
- Things break quietly and I find out late.

// WHAT CHANGES

- ✓ **It works while you sleep.**
Tell it once — "every morning at 8, send me yesterday's enquiries" — and it happens every day, on time.
- ✓ **It remembers you and your business.**
Your products, prices, people and the way you like things done. It gets better every week.
- ✓ **It does the work**
Searches the web, reads PDFs and sheets, writes documents, builds decks and updates your apps.
- ✓ **It asks before anything risky.**
Checks only look. Anything that changes, sends or spends waits for your one-tap "yes".

// INSIDE 84 FEATURES IN 10 GROUPS • HIGHLIGHTS

Talk to it anywhere

- Chat on WhatsApp or Telegram
- Voice notes in, voice replies out

It remembers and learns

- Long-term memory
- It learns new skills from experience

Works on a schedule

- Morning briefing
- Silent unless something is wrong

Research and knowledge work

- Web research with sources
- Reads long documents for you

Does real work in your tools

- Google Workspace
- Browser automation

Creative and content

- Image generation
- Content calendar

A team of assistants

- Parallel helpers
- Separate assistants for separate jobs

Choose the brain

- Automatic fallback
- Cost control

Safety and control

- Asks before risky actions
- Undo

Looked after by Wakflow

WhatsApp Connect

78
FEATURES

Your WhatsApp number, connected to everything your business runs.

Links the number your customers already know to AI replies, a shared team inbox, your CRM and your automations — so no enquiry waits, and no conversation lives only on one phone.

REPLACES WATI, Interakt and AiSensy — and the one shared phone sitting at the front desk.

// THE PROBLEM

- Our WhatsApp is on one phone.
- We pay for ads, people message us, and half of them never get a proper reply.
- Every enquiry has to be copied by hand.

// WHAT CHANGES

- ✓ **Keep your number. Go live the same day.**
Scan a QR code or type a short pairing code. No new number, no waiting for approval.
- ✓ **Every chat saved, searchable and yours.**
Messages, contacts and receipts stored securely — not only on a phone that can be lost.
- ✓ **Your whole team on one number.**
Several people answer from laptops and mobiles; the customer sees one business.
- ✓ **Many numbers, one control room.**
Sales, support, each branch and each brand get their own number and settings.

// INSIDE 78 FEATURES IN 9 GROUPS • HIGHLIGHTS

Connect your number

- Connect with a QR code
- Official WhatsApp Business API

Smart number settings

- Auto-reject calls with a message
- Ignore groups

Platform, security and operations

- A separate key for every number
- Quick, safe updates

Send every kind of message

- Real voice notes
- Swipeable product cards

AI and chatbot connectors

- Understands voice notes
- Human takeover

Chats, contacts and history

- Full chat history, safely stored
- Check who is on WhatsApp

Team inbox connection

- Automatic inbox and two-way sync
- Bring your old chats along

WhatsApp groups

- Create and brand groups
- Invite links

Events and integrations

- Live event feed
- Delivery and read tracking

WAKFLOW.COM • +91 96253 30270

96
FEATURES

One inbox. Every customer chat. Your whole team.

WhatsApp, Instagram, Facebook, website chat and email land on one shared screen. Assign each chat to the right person and reply as a team from your own business number.

REPLACES Freshdesk, Zendesk, Intercom and the WATI or Interakt team inbox — and the office phone everybody passes around.

// THE PROBLEM

- Our WhatsApp lives on one phone.
- I don't know who promised the customer what.
- Our leads are in five different places.

// WHAT CHANGES

- ✓ **No missed messages.**
Every chat from every channel in one list with a clear status: open, pending, snoozed or resolved.
- ✓ **AI first, people next.**
The AI answers routine questions in seconds; a person takes over with the full history.
- ✓ **Clear ownership.**
Each conversation belongs to one person or team, and the manager sees who has not replied.
- ✓ **Know how your team is doing.**
Live reports on volume, first reply time, resolution time and customer satisfaction.

// INSIDE 96 FEATURES IN 9 GROUPS • HIGHLIGHTS

Every channel in one inbox

- WhatsApp by QR code
- Instagram DMs

WAKFLOW Instagram Automation

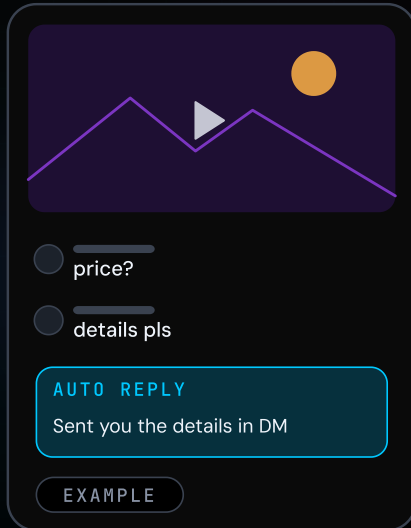

25
FEATURES

Turn every Instagram comment into a lead.

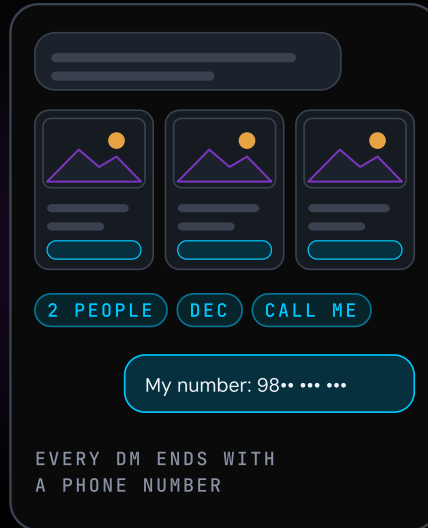

Replies to every comment and DM in seconds, in Hinglish or English, walks people through your packages with buttons and carousels, collects their number — and gets an AI voice agent to call them back.

REPLACES ManyChat-style DM tools, a person who answers comments all day, and forwarded screenshots of Instagram enquiries.

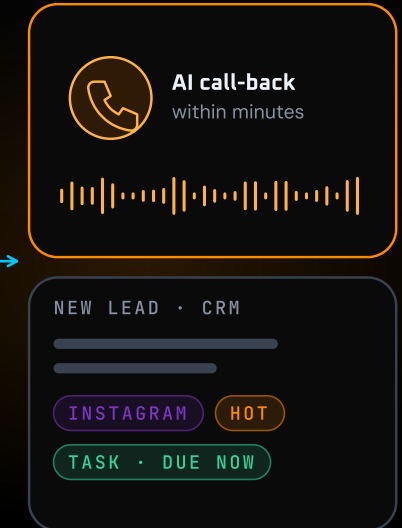

01 COMMENT

02 DM

03 CALL + CRM

// THE PROBLEM

- Our reels get hundreds of comments saying 'price?' and 'details pls'. Nobody replies for hours.
- People DM us, we chat for twenty minutes, and we never even get their phone number.
- Instagram leads never reach the sales team.

// WHAT CHANGES

- ✓ **Every comment gets a real reply in seconds.**
An AI writes a warm public reply and sends a private message to continue the chat.
- ✓ **A call back in minutes, not tomorrow.**
An AI voice agent calls, already knowing they came from Instagram.
- ✓ **Every DM ends with a phone number.**
Menus, quick-reply buttons and package carousels lead step by step to their number.
- ✓ **Every Instagram lead reaches your team.**
Tagged "Instagram", marked hot, with a follow-up task in your CRM.

// INSIDE 25 FEATURES IN 5 GROUPS • HIGHLIGHTS

Comment automation

- AI replies to every comment
- Private message to every commenter

Leads and follow-up

- Lead captured automatically
- Instagram as a tracked source

DM menus and guided flows

- Welcome menu with buttons
- Package carousels

Brand and control

- Several accounts, one system
- Official Instagram connection

Instant AI call-back

- Number in the DM, call on the phone
- The caller knows the context

WAKFLOW Dashboard Websites

41
FEATURES

Your website, updated by you, live in seconds.

Change a price, add a date, swap a photo or publish a new page from your own dashboard. No developer, no waiting. Every enquiry and booking goes straight to your WhatsApp, CRM and sheet.

REPLACES The WordPress-plus-plugins website, the separate booking form tool, and “please ask the developer to change the price”.

// THE PROBLEM

- Every small change needs the developer.
- The website looks nice but brings no business.
- Google does not show us.

// WHAT CHANGES

- ✓ **You change it, it is live.**
Press Save and the very next visitor sees the new price, date, photo or line of text.
- ✓ **Enquiries and bookings that actually reach you.**
Every form checks the phone number and sends the lead to your CRM and sheet at once.
- ✓ **Every part of the page is editable.**
Products, prices, dates, photos, reviews, FAQs, offers and whole page sections.
- ✓ **Take payment online, safely.**
Part-payment or advance by UPI or card, counted as paid only when the gateway confirms.

// INSIDE 41 FEATURES IN 6 GROUPS • HIGHLIGHTS

Edit everything from your dashboard

- Prices by location and option
- Dates, batches and slots
- Coupons and offers

Found on Google and by AI assistants

- Structured data built in
- Ready for AI search

Changes go live instantly

- No rebuild, no waiting
- Draft and live switches

WAKFLOW

AI WhatsApp Agent

47

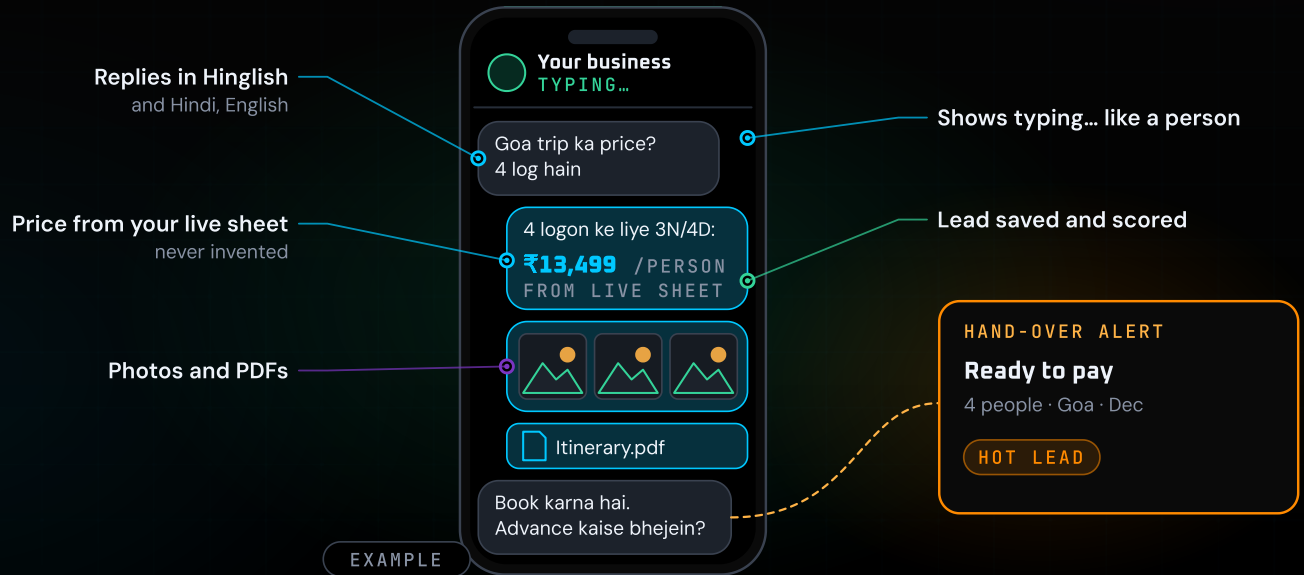

FEATURES

Your best salesperson, on WhatsApp, every hour of the day.

Answers every enquiry in seconds from your own price list, stock and policies — in Hinglish, Hindi or English — then qualifies the lead, sends photos and catalogues, and brings in your team the moment a human is needed.

REPLACES

Menu-style chatbot builders in WATI, Interakt and AiSensy, AI chat platforms, and the night-shift staff you would otherwise hire.

// THE PROBLEM

- Leads message at 11 pm and we reply next morning. By then they have booked with someone else.
- My staff answer the same ten questions all day — and still get the price wrong.
- Chatbots we tried were robotic. Customers typed 'agent' and left.

// WHAT CHANGES

- ✓ **Replies in seconds, not hours.**
Every message answered immediately — nights, Sundays and festival days included.
- ✓ **Sells, not just answers.**
Asks the right question, recommends two or three options and moves every chat to a next step.
- ✓ **Answers from your real data, never from guesswork.**
Looks up your live price list, stock, dates and policies before it says anything.
- ✓ **Knows when to call a human.**
Big orders, discounts, complaints and ready-to-pay customers are flagged to your team instantly.

// INSIDE 47 FEATURES IN 8 GROUPS • HIGHLIGHTS

Conversations that feel human

- Hinglish first, any language next
- Understands voice notes

Hands over to your team at the right moment

- Instant alert to your team
- Bot steps aside when your team replies

Answers from your own data

- Live price list and catalogue
- Never invents a price

Captures and qualifies every lead

- Lead details extracted
- Hot, normal or cold score

Sells like your best salesperson

- Objection handling
- Always a next step

Follows up and re-engages

- Automatic follow-ups
- Re-engage old leads

Sends photos, catalogues and links

- Product photos on request
- PDF catalogues

Reliable and safe by design

- Backup AI brain
- One agent per brand, number or branch

WAKFLOW

AI Voice Calling Agent

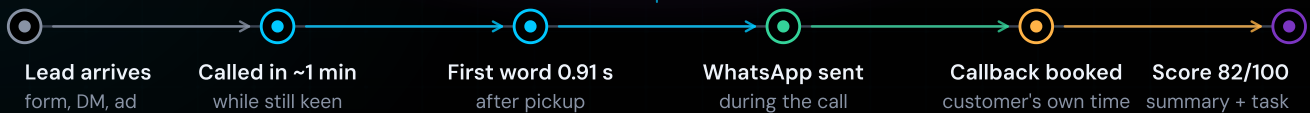

56

FEATURES

An AI caller that sounds human and calls within a minute.

Phones every new enquiry in natural Hinglish, answers from your real prices and policies, sends details on WhatsApp during the call, and hands your team a recording, a summary and a follow-up task.

REPLACES The manual telecalling shift, the “we will call you back” that never happens, and the recorded-message robocall.

// THE PROBLEM

- By the time we call back, the lead has gone cold.
- We have more leads than people to call them.
- I never know what actually happened on the call.

// WHAT CHANGES

- ✓ **Every lead called in about a minute.**
A fresh enquiry is dialled about sixty seconds after it arrives — while they still remember you.
- ✓ **Acts during the call.**
Sends details on WhatsApp, books a callback and flags a hot lead — all while still talking.
- ✓ **Sounds like a person, not a robot.**
First word in under a second. She can be interrupted, and hears tone as well as words.
- ✓ **Every call written down and scored.**
Recording, transcript, AI summary, lead details and a quality score out of 100.

// INSIDE 56 FEATURES IN 7 GROUPS • HIGHLIGHTS

Natural conversation

- Answers in under a second
- You can interrupt her

Quality and records

- A quality score on every call
- Stereo recordings

Calling and campaigns

- Instant call on every new lead
- Bulk campaigns from a spreadsheet

Compliance and safety

- Opt-out that nobody can switch off
- Honest about being an AI

Actions during the call

- Sends WhatsApp while talking
- Flags hot leads without ending the call

Connections

- Your CRM
- Instant alerts on Telegram

Your control panel

- Edit the script in your browser
- Versions and one-click revert

- ☐ 16:00
- ☐ 17:45

EVERY LEAD GETS A TASK

// THE PROBLEM

- Leads come in on three WhatsApp numbers, Instagram and the website — and half of them never get a call back.
- When a salesperson leaves, their customers leave with them.
- Every CRM I tried was built for somebody else.

// WHAT CHANGES

- ✓ **Leads enter the CRM by themselves.**
WhatsApp chats, Instagram DMs, website forms and calls become leads, tagged with their source.
- ✓ **Built around your business, not the other way round.**
Your own record types, fields and stages — Bookings, Site Visits, Students, Patients.

- ✓ **Nobody forgets a follow-up.**
Every new lead gets a task with a due date and an owner — “My follow-ups today”.
- ✓ **Each salesperson sees their own leads. You see everything.**
Set who can see, edit or delete what — down to single fields and records.

// INSIDE 62 FEATURES IN 12 GROUPS • HIGHLIGHTS

Shaped around your business

WAKFLOW

Lead Capture & CRM Sync

26

FEATURES

Every enquiry in your CRM. Automatically.

Picks up every enquiry from your WhatsApp numbers, Instagram, website and calls, cleans it, tags where it came from, puts it in your CRM with a follow-up task — and checks every morning that no lead was lost.

REPLACES Copying numbers from WhatsApp into Excel, “please add this lead” messages, and the weekly argument about which ad brought the business.

// THE PROBLEM

- We get enquiries on four WhatsApp numbers, Instagram and the website. Half of them never reach the sales sheet.
- I spend lakhs on ads and I still don't know which number or post brings the bookings.
- The same customer is in our system three times, and one of them has the wrong name.

// WHAT CHANGES

- ✓ **No lead is typed by hand.**
Every message, comment, form or booking appears in your CRM within about a minute.
- ✓ **One customer, one record.**
“+91 98...”, “098...” and “98...” are the same person — updated, never duplicated.
- ✓ **You always know where each lead came from.**
Which number, Instagram, website, partner or creator sent them.
- ✓ **Checked every single day.**
A morning audit compares every new lead with your CRM: GREEN, AMBER or RED.

// INSIDE 26 FEATURES IN 5 GROUPS • HIGHLIGHTS

Capture from every channel

- Every WhatsApp number

A polite WhatsApp reminder with the amount and a payment link. It stops once paid.

- ✓ **Money tracked to the paisa.**
Total, amount paid, advance due, balance, discount and coupon — exactly as charged.
- ✓ **Fewer no-shows.**
A confirmation on booking, and reminders a day and an hour before.

// INSIDE 23 FEATURES IN 4 GROUPS • HIGHLIGHTS

Booking capture

- Online seat holds and bookings
- WhatsApp booking bot
- Appointment and slot calendar

Payments

- Online payment with UPI and cards
- Payment links on WhatsApp
- Advance-collected tick

Reminders and follow-ups

- Payment-due reminders
- Renewal reminders
- Feedback and review requests

Invoices and records

- Branded PDF invoice
- Invoice on WhatsApp
- Daily bookings summary

WhatsApp Broadcasts

26

FEATURES

WhatsApp broadcasts that feel personal, not like spam.

Reach your past enquiries and customers with offers, launches and reminders. Every message is written freshly for each person, sent at a human pace, and every reply is answered instantly.

REPLACES The broadcast tools in WATI, Interakt and AiSensy, and the copy-paste “broadcast list” routine on your phone.

// THE PROBLEM

- We have thousands of old enquiries on WhatsApp and nobody follows them up.
- When we tried bulk sending, the number got restricted.
- The broadcast went out, 60 people replied, and we answered them the next day.

// WHAT CHANGES

- ✓ **Every message feels personal.**
Your offer rewritten into many versions in your brand voice — Hinglish, Hindi or English.
- ✓ **Every reply answered in seconds.**
Replies go to your AI WhatsApp Agent or team inbox while interest is still warm.
- ✓ **Sent at a human pace.**
“Typing...” before every message, and natural, random gaps between them.
- ✓ **Replies become leads.**
Every responder saved to your sheet and CRM with the source “Bulk Message”.

// INSIDE 26 FEATURES IN 6 GROUPS • HIGHLIGHTS

Lists and audiences

- Send to a simple sheet
- Clean numbers before sending

Replies handled instantly

- Every reply gets an instant answer
- Opt-out detection

Personalised messages

- A fresh message for every person
- Buttons, lists and carousels

Official WhatsApp API campaigns

- Approved templates
- Delivery and read tracking

Safe, human-paced sending

- “Typing...” before every message
- Random gaps between messages

Reports

- Campaign report

// GHOOO SASTE ME – “FIXED-PRICE TRIPS” OFFER

WAKFLOW

Lead Finder

28

FEATURES

Your next 100 prospects, found while you sleep.

Type "50 marketing heads at real estate firms in Pune" into a chat. Lead Finder finds the people, their companies and work emails, and hands you a clean list — with a first message drafted for each one.

REPLACES Hours of manual LinkedIn searching, copy-pasting into spreadsheets, and paid lists that are out of date the day you buy them.

YOU TYPE IN CHAT

Find 50 marketing heads at real estate firms in Pune

On it. Your list will be in the sheet by morning.

HIRING NOW • 6 COMPANIES

JOB POSTS = BUYING SIGNAL

LEADS • GOOGLE SHEET

NAME	TITLE	COMPANY	WORK EMAIL
	Marketing Head		✓
	Head of Marketing		✓
	Marketing Manager		✓
	CMO		✓
	Brand Manager		CHECK
	Growth Lead		✓

FIRST MESSAGE DRAFTED

EXAMPLE

// THE PROBLEM

- My sales team spends the whole morning searching, not selling.
- We bought a database and half the emails bounced.
- We don't know which companies need us right now.

// WHAT CHANGES

- ✓ **Ask in plain words.**
Describe who you want — job title, industry, city, how many. No filters to learn.
- ✓ **Work emails found and checked.**
Several sources searched for each person, cleaned and checked before use.
- ✓ **Decision makers, not generic inboxes.**
Founders, directors, HR heads, marketing and operations managers.
- ✓ **Companies that need you right now.**
New job posts in your field and city — and who posted them.

// INSIDE 28 FEATURES IN 7 GROUPS • HIGHLIGHTS

Ask for leads in a chat

- Request leads on Telegram or WhatsApp
- Plain-language understanding

Personalised first messages

- A first message for each lead
- Draft, never auto-send

People and company search

- Search by title, industry and location
- Top contacts per company

Recruitment edition

- Hiring-signal leads for staffing firms
- Candidate and talent search

Buying signals from job posts

- New job posts in your market
- Who posted the job

Delivery and follow-through

- Google Sheet delivery
- Hand-off to cold email

Email finding and checking

- Several sources, one answer
- Verification before use

// WHAT YOU GET ON DAY ONE

- ✓ A chat request line on Telegram or WhatsApp that turns a plain sentence into a lead search.
- ✓ A buying-signal feed of recent job posts in your market.
- ✓ Search by job title, industry and city, with profile links for every person found.
- ✓ Work emails from several sources, cleaned and verified, with a first message drafted for each lead.

WAKFLOW

Cold Email Engine

48

FEATURES

Cold email that reaches the inbox, not spam.

We warm up your sending accounts, send a few well-written emails a day at a human pace, follow up in the same thread, and ping you on WhatsApp the moment a prospect replies.

REPLACES Instantly, Lemlist, Smartlead and separate warm-up tools — and the intern copying one email into Gmail a hundred times.

// THE PROBLEM

- We sent 500 emails and got two replies — both asking us to stop.
- Our main domain got blacklisted and now our invoices go to spam.
- Someone replied 'interested' and we saw it four days later.

// WHAT CHANGES

- ✓ **Lands in the inbox.**
Every account is warmed up for two weeks; daily volume climbs slowly over seven weeks.
- ✓ **It stops itself before damage is done.**
Nightly checks pause an unhealthy account and tell you which one, and why, on WhatsApp.
- ✓ **Your main domain stays safe.**
Separate sending domains and inboxes. Your real business email is never touched.
- ✓ **Every reply caught in minutes.**
Checked every ten minutes. A real reply stops the sequence and alerts you at once.

// INSIDE 48 FEATURES IN 8 GROUPS • HIGHLIGHTS

Sending accounts and domains

- Separate sending domains
- Email authentication set up for you

Safe, human-paced sending

- A seven-week ramp
- Business hours only

Warm-up

- Automatic warm-up network
- Rescued from spam

Replies, bounces and opt-outs

- Instant WhatsApp alert for real replies
- Opt-outs honoured forever

Leads and list quality

- Email verification
- Do-not-email lists

Protection and monitoring

- Nightly health guard
- Weekly inbox placement test

Campaigns and sequences

- Three-step sequences
- Personalised to each prospect

Reports

- Daily WhatsApp report

// WHAT YOU GET ON DAY ONE

- ✓ Separate sending domains and named inboxes, with email authentication checked and passing.
- ✓ A clean, verified prospect list and a three-step campaign written in your voice.
- ✓ An automatic warm-up network from the first day, with spam rescue and human timing.
- ✓ Reply, bounce and opt-out handling, with instant WhatsApp alerts for real replies.

WAKFLOW

AI Carousel Studio

24

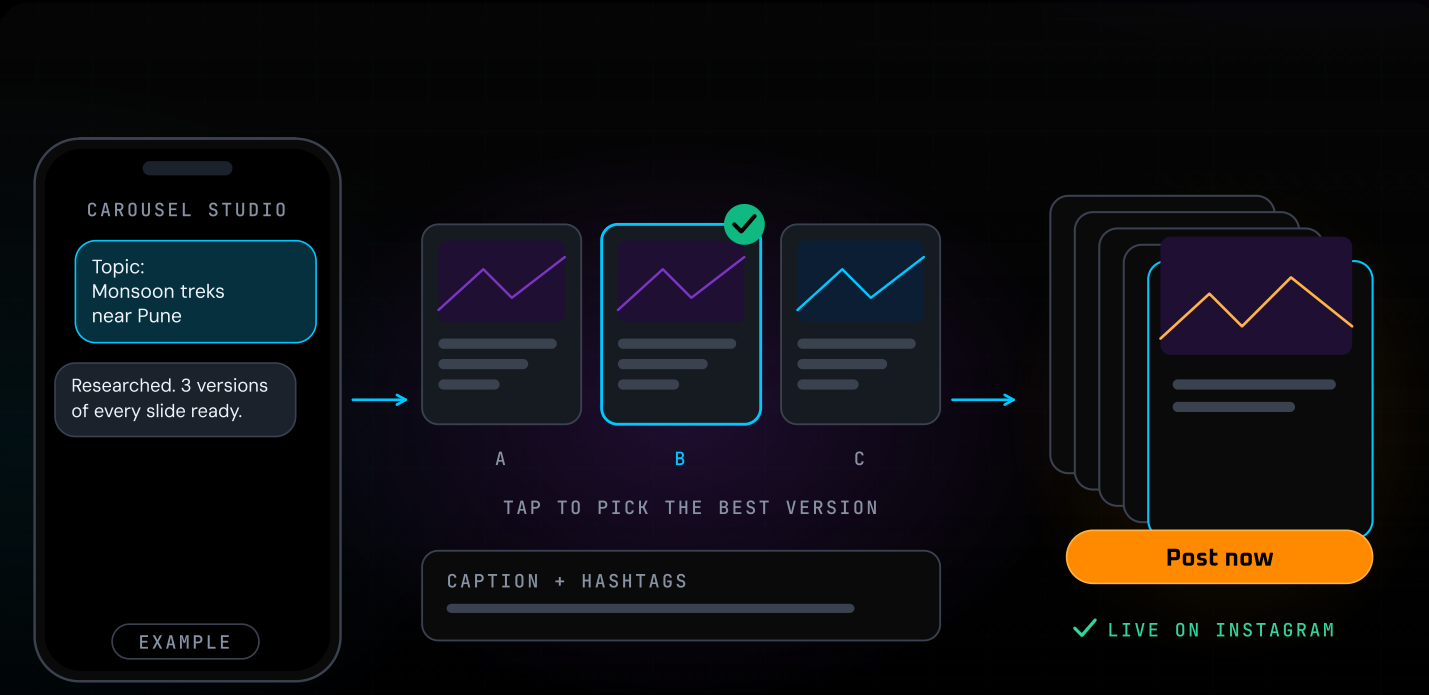

FEATURES

Instagram carousels made, approved and posted from chat.

Send one line — a topic, a city, a product. The studio researches it, writes every slide in your brand voice, designs the images, writes the caption and hashtags, and posts when you say "Post now".

REPLACES

The freelance designer you brief every week, the hours spent in design apps, and separate caption and hashtag tools.

// THE PROBLEM

- We know carousels get saved and shared, but one post takes half a day.
- Every designer makes our brand look different.
- I cannot sit at a laptop to approve posts.

// WHAT CHANGES

- ✓ **One message in, a finished carousel out.**
Slides, images, caption and hashtags come back to the same chat, ready to check.
- ✓ **Always on brand.**
Your colours, logo, handle, website and voice on every slide of every post.

- ✓ **Researched, not made up.**
It searches the web for current facts before writing a single slide.
- ✓ **You stay in control.**
Nothing is posted until you approve each slide and the caption.

// INSIDE 24 FEATURES IN 6 GROUPS • HIGHLIGHTS
From idea to slide plan

- Topic from chat
- Live web research

Approve from your phone

- Tap to approve each slide
- "Post now" when you are ready

Slides that look designed

- Three versions of every slide
- Your brand kit on every slide

Publishing and records

- One-message publishing to Instagram
- Daily content log

Captions that sell

- Captions written to be read
- A hashtag stack in every caption

For owners, teams and agencies

- Several brands, one studio
- Request carousels from WhatsApp

// WHAT YOU GET ON DAY ONE

- ✓ A studio set up for your brand: colours, logo, watermark, handle, website and voice.
- ✓ Your own chat bot on your phone, ready to take topics.
- ✓ Your Instagram business account connected for one-message publishing.
- ✓ A first carousel made with you on the call, from topic to published post.

WAKFLOW

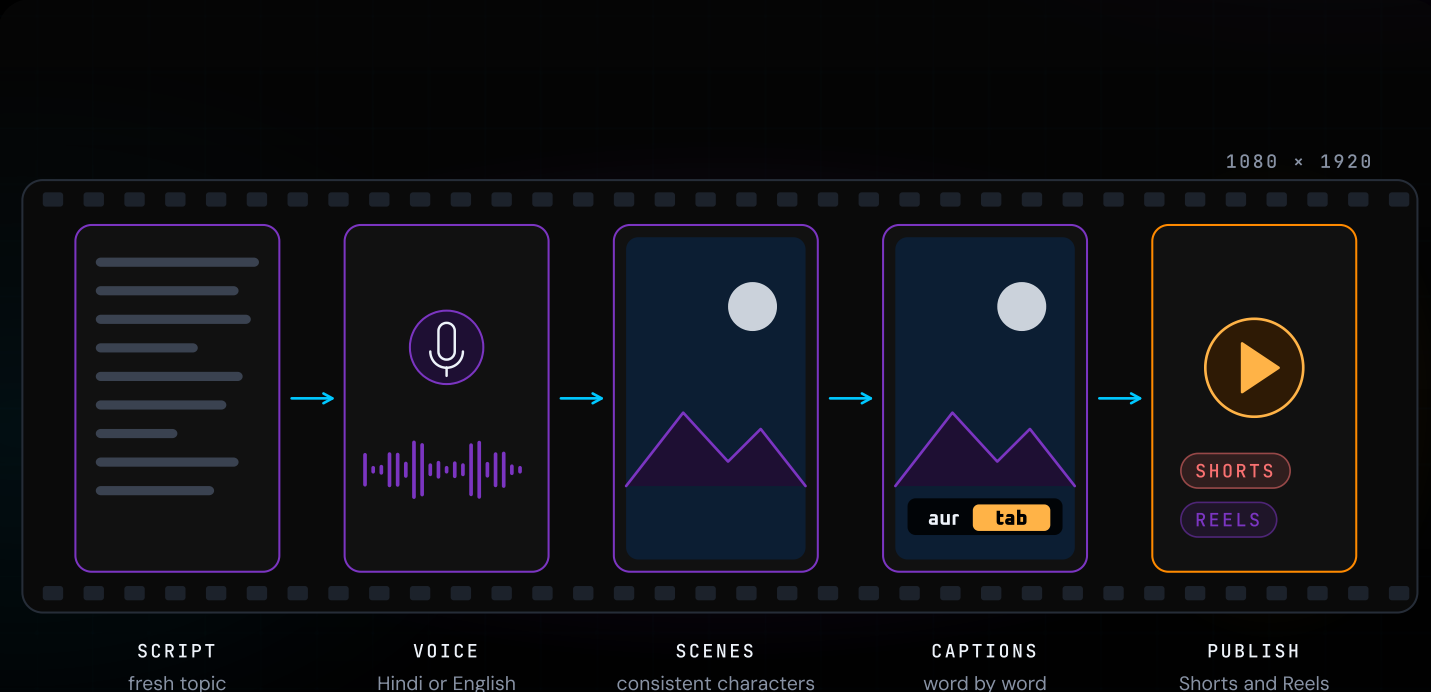

AI Video Factory

24
FEATURES

A video team that never sleeps, in your pocket.

Turns a topic, a one-line prompt or a reel you like into finished vertical videos — script, Hindi or English voice-over, visuals, motion, captions and music — ready for YouTube Shorts and Instagram Reels.

REPLACES The scriptwriter, voice artist, video editor and caption tool you would otherwise hire or juggle for every short video.

// THE PROBLEM

- Everyone says post a Short every day. We cannot even post one a week.
- We do not want to be on camera.
- Our videos all look the same, or we run out of ideas.

// WHAT CHANGES

- ✓ **Finished videos, not raw clips.**
Script, voice, visuals, motion, captions and music in one vertical 1080×1920 video.
- ✓ **Speaks your audience's language.**
Hindi voice-overs with Hinglish captions, English, or any of 75 languages.
- ✓ **Never repeats a topic.**
It remembers everything it has made and picks a fresh topic every time.
- ✓ **Faceless by design.**
No camera, no studio, no voice recording. Everything is created for you.

// INSIDE 24 FEATURES IN 5 GROUPS • HIGHLIGHTS

Story shorts on autopilot

- Hindi voice with Hinglish captions
- Word-by-word captions
- Consistent characters

Reel remix

- Send a reel link, get fresh versions

Ready-made formats

- Horror and true-crime shorts
- Kids' moral stories

Publishing and control

- Upload to YouTube
- Post to Instagram Reels

AI video clips from a prompt

- Text to video
- Four options per request

// WHAT YOU GET ON DAY ONE

- ✓ One story format set up for your channel: topic style, story structure, voice, captions and music.
- ✓ A text-to-video bot on your phone for quick AI clips.
- ✓ Your content queue sheet with the first topics.
- ✓ Your first finished video, made together with you on the call.

Automate

29

CAPABILITIES
AND READY
RECIPES

Stop doing by hand what your software should do for you.

The engine that does your team's repeated jobs — copying a lead into a sheet, sending the same WhatsApp twice, chasing an unpaid invoice — every single time, without anyone learning a new tool.

// THE PROBLEM

- Your team's time goes into copying, not selling.
- Off-the-shelf automation tools charge you per task and don't understand your business.
- When it breaks, nobody notices until a customer complains.

// WHAT CHANGES

- ✓ **One team does the wiring, forever.**
We build it, test it on your real data and keep it running. You get results, not a login.
- ✓ **A human checks anything that could go wrong.**
Money or real risk pauses for a person to approve before it goes out.
- ✓ **AI does more than move data — it makes small decisions.**
It reads a message, decides if the lead is hot, drafts a reply or flags the tone.
- ✓ **Every automation is logged, so nothing fails silently.**
If a run fails, our team is alerted before your customer notices.

// INSIDE 29 CAPABILITIES AND READY RECIPES IN 5 GROUPS • HIGHLIGHTS

Connect everything you already use

- A single engine for every tool you run
- No app is too small or too local

Built to grow with you

- One automation or a thousand a day
- You get a report, not a black box

An AI that gets the work done, not just moves data

- It reads and understands, not just copies
- Runs on private AI models when data must stay in

Recipe library

- Instant lead welcome
- Missed-call to WhatsApp
- Payment reminder
- Stale deal follow-up
- Owner's daily summary
- Quotation PDF

Someone checks before anything risky happens

- Money and refunds wait for a human tick

34

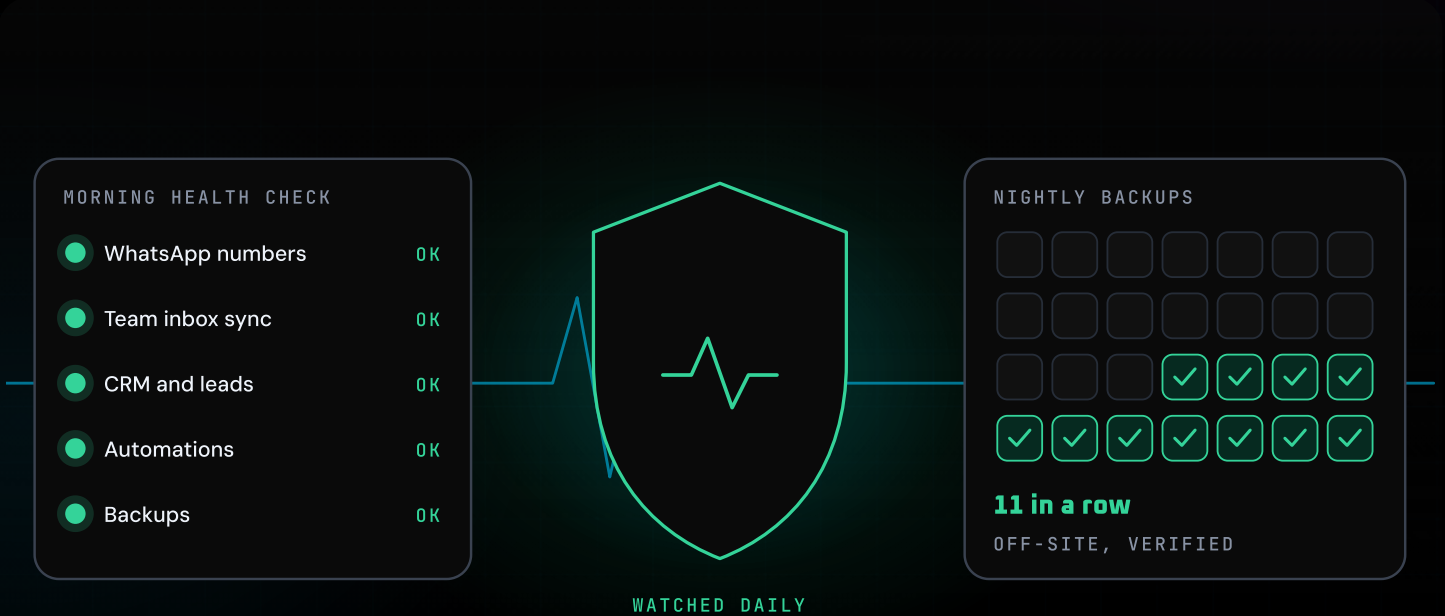

FEATURES

Your automations, watched every day and backed up every night.

Backs up everything off-site every night, checks every system every morning — WhatsApp numbers, inbox, CRM, automations and leads — and alerts our team the moment something breaks.

REPLACES

"Someone will look at it when it breaks", manual backups nobody tests, and hearing about a lost lead from an angry customer.

// THE PROBLEM

- Everything looked fine — and we lost leads for weeks.
- Our server went down and nobody knew why.
- We have backups... we think.

// WHAT CHANGES

- ✓ **Every lead accounted for.**
Each morning, every WhatsApp and website enquiry is checked against your sheet and CRM.
- ✓ **A full health check every morning.**
Numbers, inbox, CRM, automations, backups and security — summed up on your phone.
- ✓ **Backed up every night, off-site.**
Databases, WhatsApp logins, settings and the full system, with 30 days of history.
- ✓ **Silent failures caught.**
We open real results to find the errors that never show up as red.

// INSIDE 34 FEATURES IN 8 GROUPS • HIGHLIGHTS

Nightly backups

- Nightly database backups
- Off-site and verified

Automation monitoring

- Error alerts
- Hidden-error inspection

Daily health check

- Every system checked every morning
- Compares with yesterday

CRM data protection

- Data-quality checks
- Record recovery

Lead-loss monitoring

- Every enquiry traced end to end
- Exact failure point named

Server health and security

- Load protection
- Security checks

WhatsApp and inbox monitoring

- Number connection checks
- Message sync checks

Maintenance and incident response

- Fixes with a paper trail
- Monthly report
